

Location: Winnipeg Capital Region, St. Andrews Airport District

Senior Civil/Municipal Engineer

Parsus Engineering (Parsus) is seeking a Senior Civil/Municipal Engineer to support and grow its civil engineering offerings. This position is suited to an experienced engineer who enjoys leading projects, building client relationships, and helping expand the operations of a rapidly growing company.

In this role, you will lead the planning, design, and delivery of municipal and land development projects while working closely with a collaborative, multidisciplinary team. You will oversee civil design activities, coordinate engineering work across disciplines, and provide leadership throughout project delivery—from the earliest stages of planning to the end of construction. You will also provide leadership and mentoring to our existing complement of junior engineers and technologists.

The successful candidate will play an important role in strengthening and growing Parsus' presence within Manitoba by developing relationships with municipalities, clients, and industry partners and helping to identify new project opportunities in the region.

Responsibilities

- Lead and coordinate civil design work for municipal and land development projects.
- Prepare engineering studies, designs, cost estimates, specifications, and contract documents.
- Coordinate with clients, contractors, regulatory agencies, and municipal officials to resolve project issues and maintain progress.
- Support integrated design development with structural, electrical, and mechanical teams.
- Conduct site inspections to review construction progress and assess the quality of work being performed.
- Provide construction support and contract administration services during project delivery.
- Support efforts to expand Parsus Engineering's presence and client base throughout the region.
- Develop and maintain strong working relationships with municipalities, developers, and industry stakeholders.

Requirements

- Bachelor's degree in Civil Engineering.
- Minimum 10 years of experience related to surface water management and municipal infrastructure.
- Current P.Eng. designation with the Association of Professional Engineers Geoscientists Manitoba (EGM), or eligibility to obtain registration.
- Experience with municipal servicing and land development projects.
- Must possess a valid driver's license for a passenger vehicle and be willing to travel.

Knowledge, Skills and Abilities

- Strong knowledge of municipal servicing design including water distribution, sanitary sewer, drainage, and subdivision development.
- Solid understanding of municipal standards, approvals processes, and regulatory requirements.
- Ability to prepare and review engineering drawings, specifications, and contract documents.
- Strong communication and coordination skills when working with clients, contractors, and multidisciplinary teams.

About Us

Parsus Engineering is a full-service integrated design firm with offices in St. Andrews, Manitoba and Lethbridge, Alberta. We deliver engineering, design, and building performance services across Western Canada.

How to Apply

Please send resume in **PDF** file format to jobs@parsuseng.com

While we thank all applicants for their interest, only those selected for an interview will be contacted.
