

Location: Lethbridge, Alberta

Structural Engineer – Multi-Disciplinary Projects

We are seeking a motivated and detail-oriented Structural Engineer to join our aggressively growing team in Southern Alberta. In this role, you will design and oversee structural projects across commercial, industrial, residential and agricultural sectors. You will play a key part in ensuring the reliability, resilience and long-term performance of our clients' buildings while consistently delivering projects on schedule.

This position offers the opportunity to work on meaningful, varied projects and to grow your career within a collaborative, forward-thinking engineering team.

RESPONSIBILITIES

- Develop comprehensive structural design for small, medium and large multi-discipline projects through its entirety for each project.
- Review, edit, modify and approve structural engineering work assigned to this position.
- Prepare planning schedules for the resources and completion times for all assigned projects. Monitor actual resource usage and deadlines; act in conjunction with other staff members to correct cost over-runs and delays in completion.
- Mediate and resolve disputes and problems with clients, contractors, regulatory and government officials.
- Provide support to electrical, mechanical, civil and other disciplines in the development of design documents.
- Conduct on-site reviews of construction and renovation projects, to observe and evaluate the progress and quality of the work being performed.
- Periodically travel to project sites on an as required basis.

REQUIREMENTS

- Eligible to register as a P.Eng., P.L.Eng. or P.Tech.(Eng.) in Alberta
- At least 5 years of relevant experience
- Strong technical writing and communication skills.

KNOWLEDGE, SKILLS AND ABILITIES

- Prior experience with building structural design.
- Knowledge of current requirements of Regulatory authorities.
- Experience dealing with contractors.
- Strong verbal and written communication skills.
- Proven ability to work with minimal oversight and demonstrated self-initiative.
- Well-developed client management expertise.
- Aptitude for and general understanding of construction methods and procedures including subdivision development.

ABOUT US
